Laird Thermal Systems Launches New Company with Advent International Investment

December 17, 2018 – Laird Thermal Systems, an end-to-end thermal management solution provider, is now a fully-operational, independent business owned by Advent International. As a global organization, Laird Thermal Systems has the product portfolio, technical expertise, global manufacturing footprint and lifecycle services to solve complex thermal challenges and deliver optimum thermal management solutions for customers. Laird Thermal Systems works with the world’s top brands in the medical, analytical, telecom, industrial and consumer markets.

Laird Thermal Systems offers the most diverse cooling product portfolio in the industry, ranging from components and subsystems to full turnkey cooling solutions with multiple thermal technology options. Its expertise in thermoelectric modules (TEMs), thermoelectric assemblies (TEAs), liquid cooling systems (LCS) and integrated thermal management monitoring and control designs facilitates customer technology development by providing cutting edge solutions coupled with the ability to qualify, manufacture and service globally.

“Our customers are faced with maximizing product quality, increasing up-time in the field, and ensuring on-time delivery of their products and solutions. They are designing new products that perform better with more features, all in a smaller package. This adds up to thermal management issues that are more challenging than ever before,” said Karine Brand, interim CEO at Laird Thermal Systems. “Advent International has empowered Laird Thermal Systems to invest in the future of thermal management and develop high-quality, cutting-edge solutions that accelerate customer design schedules, improve performance and prolong product operating life.”

About Laird Thermal Systems

Laird Thermal Systems designs, develops and manufactures thermal management solutions for demanding applications across medical, industrial and telecommunications markets. We manufacture one of the most diverse product portfolios in the industry,

ranging from active thermoelectric modules (TEMs) and thermoelectric assemblies (TEAs) to temperature controllers and liquid cooling systems. With unmatched thermal management expertise, our engineers use advanced thermal modeling and management techniques to solve complex heat and temperature control problems. By offering a broad range of design, prototyping and in-house testing capabilities, we partner closely with our customers across the entire product development lifecycle to reduce risk and accelerate time-to-market. Our global design, manufacturing and support resources help customers shorten their product design cycle, maximize productivity, uptime, performance and product quality. Laird Thermal Systems is the optimum choice for standard or custom thermal solutions.
